

ADC MOBILE

HDMI-AV

WORKS ON:

iPhone and iPad with Lightning connectors Only.

Samsung Stratosphere II, S III, S 4, S 4 Active, Mega, Note II and Note 3, as well as Samsung Galaxy S 5 models. Also compatible with most MHL enabled devices.

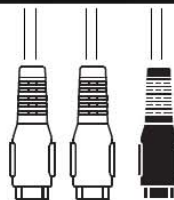

NOTE: CABLE IS DESIGNED TO PROVIDE ANALOG AV OUTPUT ONLY.

ADC MOBILE IS NOT RESPONSIBLE FOR DISPLAY ISSUES. PLEASE GUARANTEE YOUR DISPLAY HAS RCA AV INPUT AND VIDEO DISPLAY CAPABLE OF DISPLAYING THE OUTPUT OF THIS CABLE.

ADC MOBILE IS NOT RESPONSIBLE FOR INCOMPATIBLE SYSTEMS AND THERE WILL BE NO REFUNDS IF YOUR DISPLAY IS NOT CAPABLE OF DISPLAYING OR IS NOT COMPATIBLE WITH THE OUTPUT OF THIS CABLE.

SOME VEHICLES HAVE OVERRIDE MODULES AVAILABLE THAT ALLOW VIDEO IN MOTION PLAYBACK. PLEASE CALL FOR DETAILS.

HDMI TO COMPOSITE CONVERSION CABLE FOR IPHONE, IPAD AND SAMSUNG DEVICES

The **HDMI-AV** cable allows you to connect your Lightning connector-equipped Apple device or Samsung/MHL device to any composite RCA input when using the Apple Lightning to HDMI adaptor (sold separately) or Samsung MHL to HDMI adaptor (sold separately).

When using this adaptor, you will be able to mirror (**one way**) the display of your device to the attached video screen. No control of the device will be available from the attached display.

The included USB connector provides 5V power for the built-in digital to analog converter. Voltage required to power the converter may also be provided by the attached device, but if you experience any video or audio issues such as video "rolling", color dropouts or audio static, it may be necessary to plug in the USB connector.

THE USB DOES NOT TRANSFER ANY DATA OR CHARGE THE ATTACHED DEVICE. NOT ALL DEVICES ARE GUARANTEED TO WORK CONSISTENTLY WITHOUT THE USB CABLE PLUGGED IN.

iPhone & iPad are a registered trademark of Apple Inc. in the United States and other countries. Samsung and their model numbers are trademarks of Samsung in the United States or other countries.
