Display Settings

About Display Settings

SoundLinQ3 supports 8 types of Display Modes. Display Mode can ONLY be set up for the Satellite Radio source.

It is critical to setup, the correct Display Mode for the following reasons:

- For Channel information to be displayed correctly.
- For Text information to be displayed.

Display mode 1 - Minutes and Seconds used to display the selected channel number.

Minutes display hundreds, seconds display 00-99. DISC number and TRACK number are "invisible"

NOTE: This mode is preferred with CD changer emulation for Radio receivers with their own LCD.

Display mode 2 - Same as Display mode 1, except that DISC and TRACK number always display "1".

NOTE: Some Radio receivers refuse to display minutes and seconds if DISC or TRACK number are "invisible". Please use this mode if your Radio receiver displays only "CD1" on the LCD.

Display mode 3 - In this mode TRACK number is used to display hundreds, Minutes are used to display tens, Seconds are used to display single digits. DISC number is "invisible".

NOTE: This mode is most common for the radio integrated into the Navigation System.

Display mode 4 - In this mode TRACK number used to display hundreds, Minutes are used to display tens, Seconds are used to display single digits. DISC number is always "1".

Display mode 5 - Alternate variation of Display mode 1.

Display mode 6 - In this mode TRACK number is either 10, 11 or 12 where "0" from 10, "1" from 11 and "2" from 12 are used to display hundreds, Minutes are used to display tens, Seconds are used to display single digits. DISC number is always "12".

NOTE: This mode is most common for the radio integrated into the Navigation System which does not display Song Title in MD changer emulation mode (Alternative for Display Mode 3, allows Song Title to be displayed for channels less than 100) .

Display mode 7 - In this mode TRACK number is either 10, 1 or 2 where "0" from 10, "1" and "2" are used to display hundreds, Minutes are used to display tens and single digits. DISC number is always "12".

Display mode 8 - In this mode TRACK number is either 10,11 or 12 where "0" from 10, "1" from 11 and "2" from 12 are used to display hundreds, Minutes are used to display tens, Seconds are used to display single digits. DISC number is always "12".

NOTE: Alternative to Display Mode 7.

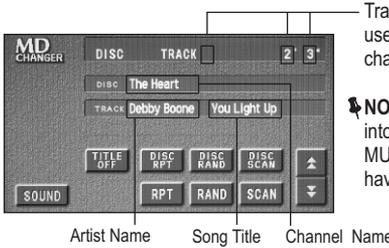

NOTE: Use Display mode 8 in MD changer emulation mode. In this mode TRACK number is used to display the channel number.

Changing Display Mode

- ... Enter into "Satellite Radio Input Settings" Mode (See "Satellite Radio Input Settings" for details).
- ... Press [SCROLL UP] to switch between Display Modes.
- ... Check channel 23, 81, 92, and 123, to confirm correct Display Mode selection.

NOTE: On some Radios both DISC number and TRACK number must be different from "0" or "invisible" in order for TEXT to be displayed properly.

Minutes and Seconds are used to display selected satellite channel number.

NOTE: Present if MD-TEXT is supported by the Radio Receiver (may differ on Head units model and year)

NOTE: Please check channel 081, 092 and 123 to make sure those channel numbers are displayed properly.
